

Flooring Fundamentals one-day course

The Flooring Fundamentals course is a one-day introductory course suitable for new entrants or as a refresher specifically designed to broaden knowledge for the retail and wholesale sectors of the flooring industry.

Along with a need to keep up-to-date with the latest interior and product trends and fashions, installation methods and general product knowledge regarding the care, maintenance and consumer benefits of different floorcoverings should also be given as much priority.

By attending a Flooring Fundamentals course you gain more knowledge about floor covering types and their behaviours plus you can see installation techniques in action.

The day is also a full-on taster for those pondering whether to undertake the Flooring Planning & Design course to gain a National Certificate.

Certification for this course is optional. A Floor NZ Flooring Fundamentals Certificate can be achieved by completing a work-based assignment when returning to the workplace.

The venue is at Floor NZ's training facility in Christchurch where apprentice block course training takes place.

The date is Wednesday April 15th. Places are limited so contact us now.
