

Flooring Fundamentals one-day course

The Flooring Fundamentals course is a one-day introductory course suitable for new entrants or as a refresher specifically designed to broaden knowledge for the retail and wholesale sectors of the flooring industry.

Along with a need to keep up-to-date with the latest interior and product trends and fashions, installation methods and general product knowledge regarding the care, maintenance and consumer benefits of different floorcoverings should also be given as much priority.

By attending a Flooring Fundamentals course you will gain knowledge about floor covering types and their behaviours plus you can see installation techniques in action.

A Certificate is awarded after completing a work-based assignment when returning to the workplace.

The day is also a taster for those pondering whether to undertake the Flooring Planning & Design course to gain a National Certificate. Completion of this course will go towards the Flooring Planning & Design qualification.

The venue is at Floor NZ's training facility in Christchurch where apprentice block course training takes place.

Course Dates

Tuesday 14th Sep

Wednesday 15th Sept

10.30 to 4.00 pm
