

Demonstrate knowledge of Timber flooring products – part 2

Video acknowledgement – Karhs Timber Floors

Making Engineered Timber Flooring

Engineered Timber process

1. The tree is de barked
2. Quarter sawn into strips
3. Air stack fillet dried
4. Kiln dried
5. Top hardwood species cut into desired profile... 1,2 or 3 strip
6. The core cross hatched plies of timber on a base
7. Layers glued and pressed together
8. The top layer sanded, coated and UV cured
